An AI- Companion

For First Time Mum

cocuna

UNSW FOUNDERS

Personal Story - My Sister

- Anxiety during pregnancy & postpartum
- Information overload & distrust
- Isolation and alone
- Lost

Understanding the Problem

Every 1 in 5 new and expecting Mothers face Anxiety, Isolation, and Symptoms of Depression

(Dennis et al. 2017; Fawcett et al. 2019)

70%

report feeling unprepared or under-supported in the first 3 months after birth.

(Al-Mutawtah, Campbell, Kubis, & Erjavec, 2023)

Mothers with low emotional and informational support are **4X** more likely to experience antenatal depressive symptoms.

(Edmonds, 2020)

1.Dashboard

- Checks in on mood, new symptoms, sleep, nutrition base on previous data
- Baby progress everyday
- Quick access to others features

2.Cocuna AI Chat

- Listening and personalise with context and cultural
- Trusted resources
- Uses red-flag pathways to help her decide when something is likely normal vs when to book a clinician

3.Partner Mode

- Gives her partner one or two clear ways to support her each day
- Reduces the pressure on mum to ask for help and involves the whole household in her care

4.Care Finder

- Helps her find verified midwives, GPs and telehealth clinicians in one place
- hows who is available now, with their areas of focus

Edit with Lovable

Cocuna: An AI-Powered Companion

Provides daily mood and symptom check-ins

Remembers personal context to deliver hyper-personalized guidance

Offers evidence-cited, non-diagnostic guidance

Provides clear sources (e.g. ACOG/NHS/WHO guidelines) to build trust

Includes "red-flag signal"

Helps users decide when to seek medical care without claiming to diagnose

Seamlessly supports pregnancy, birth, and postpartum

Guides women through the entire maternal journey, including the fourth trimester

Unique Value Proposition

- **Hyper-personalised, context-aware AI**

  Cocuna's AI connects the dots between users' mood, symptoms, and stage of pregnancy/postpartum, providing personalized guidance.

- **Deep support for postpartum and mental health**

  Cocuna goes beyond just pregnancy tracking, offering comprehensive support for the critical fourth trimester and maternal mental well-being.

- **Evidence-cited responses build trust**

  Cocuna provides guidance based on reputable medical sources (ACOG, NHS, WHO), unlike random forums and opaque chatbots.

- **Privacy-first and ad-free experience**

  Unlike many incumbents, Cocuna prioritizes user privacy and does not rely on ads or affiliate sales, creating a calm, trustworthy environment.

- **Contexts and culturally different users**

  Cocuna remembers the user's personal context and past experiences, allowing for a truly personalized and supportive companion throughout the maternal journey.

- **Real time booking consulting via app**

BMC

BUSINESS MODEL CANVAS

Problem

- Anxiety & emotional volatility during pregnancy and postpartum; need constant reassurance
- Conflicting info and mistrust
- Poor postpartum support
